

Sexually Transmitted Infection PCR Testing

Over 30 different bacteria, viruses and parasites are known to be passed through sexual contact. Eight of these pathogens are related to the greatest incidence of sexually transmitted disease. Advanta Genetics offers **PCR Molecular Pathogen Testing** as a diagnostic solution in **less than 24 hours** for common STI infections.

Pathogens Tested:

Chlamydia trachomatis
Gardnerella vaginalis
Herpes simplex viruses 1
Herpes simplex viruses 2
Mycoplasma genitalium
Neisseria gonorrhoeae
Trichomonas vaginalis
Ureaplasma urealyticum/parvum
